Sequence 126, Application US/10667022

GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Kenneth W. Dobie
TITLE OF INVENTION: ANTIERNER MODULATION OF PHOSPHOINOSITIDE-3-KINASE, REGULATORY SUBLATILE OF INVENTION: ANTIERNER MODULATION OF PHOSPHOINOSITIDE-3-KINASE, REGULATORY SUBLATILE REFERENCE: RTS-0376
CURRENT APPLICANION NUMBER: US/10/667,022
CURRENT APPLICANION NUMBER: US/10/667,022
CURRENT PILING DATE: 2003-09-18
NUMBER OF SEQ ID NOS: 147
SEQ ID NO 126
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         RESULT 389

Sequence 872676 Application US/10719900

Sequence 872676 Application US/10719900

PUBLication No. US20050026164A1

GENERAL INFORMATION:

APPLICANT: Xue Mei Zhou

TITLE OF INVENTION: Methods of Genetic Analysis of Mouse

TITLE OF INVENTION: Methods of Genetic Analysis of Mouse

TILLE REFERENCE: 3528.1

CURRENT APPLICATION NUMBER: US/10/719,900

CURRENT FILING DATE: 2003-11-20

PRIOR PILING DATE: 2002-11-20

PRIOR FILING DATE: 2002-11-20
